PROJECTS

WEATHER-WEB

- Designed and developed a web-based Weather App that provides real-time weather updates based on user input (city/location).
- Integrated with a public weather API (e.g., OpenWeatherMap) to fetch and display current temperature, humidity, weather conditions, and more
- Technologies Used:** JavaScript, HTML, CSS, Weather API
- Outcome:** Gained hands-on experience in API integration, asynchronous JavaScript (fetch/async-await), and improving user interaction through dynamic content updates.

Tic-Tac-Toe Game

- Developed a web-based **Tic-Tac-Toe** game allowing two players to play interactively on a 3x3 grid.
- Implemented game logic to detect winning conditions, draws, and handle user inputs effectively. Enhanced user experience with responsive design and visual feedback for game status (win, lose, draw).
- Technologies Used:** JavaScript, HTML, CSS
- Outcome:** Strengthened problem-solving skills, improved understanding of conditional logic, and practiced DOM manipulation for real-time updates.
